Objective

Aspiring Web Developer and Data Scientist with a solid foundation in computer science, specializing in web technologies and data-driven solutions. Passionate about building interactive, user-centric web applications and dashboards. Currently pursuing a B.Tech in Computer Science and Engineering at Amrita University. Eager to contribute to innovative projects through a software engineering internship, leveraging expertise in full-stack web development, data visualization, and machine learning.

Education

B.Tech in Computer Science and Engineering

Amrita Vishwa Vidyapeetham, Bangalore, India

CGPA: 8.18/10.0

Expected: 2026

Higher Secondary School

Alpine High School, Birgunj, Nepal

CGPA: 3.1/4

July 2020 - 22

Secondary School

Shree Maiasthan Vidyapeeth M. V, Bigunj, Nepla

CGPA: 3.32/4

April 2019

Projects

Blockchain-Based File Storage and File Sharing System with Time-Restricted Access using IPFS 2023

Tools/Technologies: IPFS, Solidity, Node.js, AWS, Metamask, JavaScript, Bootstrap

Developed a decentralized file storage and sharing system leveraging Blockchain and Interplanetary File System (IPFS) to ensure secure and tamper-proof file storage with controlled, time-restricted access.

- Utilized IPFS for decentralized and immutable file storage, preventing data tampering.
- Implemented smart contracts using Solidity to automate time-restricted access, ensuring files are accessible only within a predefined time frame.
- Developed a user-friendly web interface with Node.js and Web3.js for seamless file uploading, sharing, and access management.

Task Master : Real-Time Task Reminder System

2024

Tools/Technologies: Javascript, ReactJs, Bootstrap, Express, NodeJs MySQL, SMTP

A real-time task management system designed to help students efficiently manage and complete assignments.

- Integrated email and system notifications to alert users of upcoming deadlines and incomplete tasks.
- Developed an intuitive interface for seamless task addition, monitoring, and updates.
- Improved time management and organization through real-time reminders.

Skills

- Programming Languages and Tools:** JavaScript, Java, Python, C++, Git
- Database:** MySQL, MongoDB
- Web Development:** ReactJs, ASP.NET ,bootstrap, CSS, HTML
- Soft Skills:** Problem Solving, Analytical Thinking, Team Work

Certifications

- IBM Front-End Developer Professional Certificate
- Certificate of Participation and Mentorship from the "Byte Battle Hackathon."

Publication and Achievements

- Blockchain Based File Storage and File Sharing System with Time-Restricted Access Using InterPlanetary File System** <https://ieeexplore.ieee.org/document/10915130>
- Empowering Student Success - A Comprehensive Task Management and Notification System**
- Mentored Class 6 to 12 students at **Byte Battle Hackathon-2024**, guiding them in project development.
